Caleb M. Saville, Manager and Chief Engineer; Wm. E. Johnson, Div. Engr. reservoir division; David F. Payne, Chief of Office; James E. Garratt, Office Engineer; Frank S. Brainard, Asst Engineer.

Bills due May 1 and Nov. 1—5 per cent, added ten days after due—1 per cent. on 1st day of each month after.

Surveys for these works were commenced Oct. 1853; ground broke June, 1854 and first pumping of water, Oct. 23, 1855. The engines and pumps were used in supplying water to the Garden Street Reservoir from the Connecticut river up to Jan. 2, 1867, at 2 p. m., at which time water from West Hartford was substituted.

Owing to droughts and failure of the reservoirs to supply a large part of the city, the pumps were run from Sept. 25, 1879, to Jan. 23, 1880; from Oct. 2, 1891, to Dec. 8, and from Dec. 22 to 30, 1891; from Dec. 4, 1899, to Feb. 9, 1900, with the exception of eight days for repairs. The hourly capacity is 154,000 gallons delivered at reservoir, which is at an elevation of 125 feet above the river, and $\frac{1}{2}$ miles distant from it. The load upon the engine at low water, and with a full reservoir, is 11,934 pounds.

Total consumption of water for the year ending March 1, 1899, when it was all measured at the pumping works, was 700,000,000 gallons. Under the direct distribution from the West Hartford reservoir during 1876 was 1,808,500,000 gallons, equal to 4,954,795 gallons per day. The average daily consumption for 1918 was 12,016,000.

The pier in the river, to protect the receiving pipe, is where at low water, there is 12 feet in depth, the water running into a well 140 feet from the river.

The ORIGINAL GARDEN STREET RESERVOIR, 97-175 Garden street, was sold to the Hartford Fire Ins. Co. in 1919. Torn down 1921.

THE WEST HARTFORD RESERVOIR was completed and water furnished the city therefrom at 2 o'clock p. m., January 2, 1867, at which time the pumps ceased working, and have been used since only occasionally.

Reservoir No. 1 is five miles from City Hall, and at high water flows 32 acres. Its capacity of 34 feet in depth is 145,985,548 United States gallons; 284.21 acres watershed purchased in 1904. The altitude of the reservoir at top water above low water of Connecticut River is 260 feet, and gives a head at the City Hall of 135 feet over the old works.

Reservoir No. 2 is $\frac{1}{2}$ miles beyond Reservoir No. 1, covering a water surface of 49 acres with 41 feet depth and capacity of 283,694,375 gallons. Forty acres of land was purchased in 1890 for additional water shed.

Reservoir No. 3, is located about one mile northwest from Reservoir No. 1, and was completed October 30, 1875, with a capacity, when filled to depth of 36 feet, of 145,595,829 gallons, covering 25 42-100 acres at top water line. Total cost \$59,117.78.

Reservoir No. 4, located in towns of New Britain and Farmington. It is $\frac{1}{2}$ miles from the city by the south road. The reservoir overflows 160 of the 183 acres; 79.82 acres land purchased in 1904. The land cost \$9,764.90; construction, \$54,124.86. Its capacity of 20 feet in depth is 601,353,592 gallons.

Reservoir No. 5, on Mine Brook, about half a mile from No. 1, with a capacity 20 feet in depth of 94,132,000 gallons; constructed in 1884, at an expense of \$18,549 and paid from receipts of water rents.

Reservoir No. 6 is located about 2 miles north of the first water shed, and covers about 100 acres, with a capacity 27 feet in depth of 765,115,176 gallons; it was completed Oct. 1, 1895, and cost \$694,731.06; 4 acres land purchased in 1904. Making a total supply of over 2,035,000,000 gallons in the six reservoirs.

Mountain Stream Canal has been thoroughly excavated, bringing a supply of water from three rivulets into Reservoir No. 2, constructed in 1883.

Brandy Brook Canal, $\frac{1}{2}$ miles long, 16 feet deep, 12 feet wide at bottom, connecting Brandy Brook with Reservoir No. 4, constructed in 1888.

Nepaug Reservoir, a storage reservoir taken from Phelps Brook and the Nepaug Valley, near Collinsville, at an elevation 485 feet above sea level, 851 acres, capacity 9,850,000,000 gallons, conveyed through 44-inch steel pipe capacity of 30,000,000 gallons per day has been constructed. On March 1st, 1918, the amount of water in storage in the Nepaug Reservoir was 8,200,000,000 gallons.

ON THE EAST. By the east bank of Connecticut river.

ON THE SOUTH. In April, 1817, the following division line was run between the towns of Hartford and Wethersfield, under G. Gillett, Surveyor General, assisted by John Hempstead, Jonathan Wells and Elijah Keach, of Wethersfield, and monuments properly placed; beginning at the northeast corner of Wethersfield on a line between the towns of Wethersfield and East Hartford, near a place called pewter pot brook S. 87° west at a stone monument—thence across Connecticut river, 25 chains 87 links, thence to a stone monument in the middle of Standish's Island 22 chains 61 links—thence to a stone east of Standish's creek 2 chains 60 links—thence to a stone on the west side of Standish's creek to the stone N. F. distant from the stone N. F. 16 chains 97 links, thence 8 chains 56 links to the fence on the east side of the main road leading from Wethersfield to Hartford, near the north side of the Folly bridge—thence 1 chain 64 links to the stone monument on the west side of said road, marked H. & W. near the northwest corner of said bridge—thence 9 chains 28 links to a heap of stones in the fence running east and west—thence 80 rods to a stone monument in the fence—thence 80 rods to an elm tree marked—thence 88 rods to a stone monument—thence 80 rods to a heap of stones in the fence—thence 25 rods to the east side of the Rocky Hill road to a stone monument—thence till it strikes the line between Hartford and West Hartford, as established in 1854.

ON THE WEST. From Farmington avenue on the west line of Prospect avenue north to Albany avenue, and from thence on the same line prolonged to town of Bloomfield; the line from Farmington avenue, south commencing at the northwest corner of Farmington avenue at the present boundary stone, it shall cross Prospect hill road, to the northeast corner of said road and Farmington avenue, from thence running south on the east line of said Prospect hill road to Park street road, thence in a direct line across Park street road on Prospect avenue (formerly McKegg road); and thence south on the east line of Prospect avenue (formerly McKegg road) and the east line of New Park avenue (formerly Baker road), until it strikes the present boundary line; thence south on the present boundary line between Hartford and West Hartford, as set off in 1854.

WARDS.

As enacted by the Legislature, 1916 session, Re-districting the City and Town of Hartford into ten wards.

FIRST.

Beginning at a point in the center of Wethersfield avenue opposite the center of Waverne avenue; thence running easterly in the center of Waverne avenue and such line produced to the west bank of the Connecticut river; thence northerly along the west bank of the Connecticut river to a point thereon opposite the center line of Charter Oak avenue produced to meet said river; thence westerly along said line and through the center of Charter Oak avenue to the center of Main street; thence southerly through the center of Main street to a point opposite the center of Park street; thence westerly through the center of Park street to the center of Washington street; thence southerly through the center of Washington street to a point opposite the center of Barnard street; thence easterly through the center of Barnard street to the center of Maple avenue; thence southerly through the center of Maple avenue to a point opposite the center of Benton street; thence easterly through the center of Benton street to the center of Franklin avenue; thence southerly through the center of Franklin avenue to a point opposite the center of Barker street; thence easterly through the center of Barker street to the center of Wethersfield avenue; and thence northerly through the center of Wethersfield avenue to point of beginning.

SECOND.

Beginning at a point on Main street opposite the center of Charter Oak avenue; thence easterly through the center of Charter Oak avenue and the

line of said avenue produced to the west bank of the Connecticut river; thence northerly along the bank of said river to the northerly boundary line of the city of Hartford; thence westerly on said northern boundary to the tracks of the New York, New Haven, and Hartford Railroad Company; thence southerly through the center of the tracks of the New York, New Haven, and Hartford Railroad Company to a point opposite the center of Canton street; thence westerly through the center of Canton street to the center of Windsor avenue; thence southerly through the center of Windsor avenue to the center of Main street; thence southerly through the center of Main street to place of beginning.

THIRD.

Commencing at a point in the center of the tracks of the New York, New Haven, and Hartford Railroad Company opposite the center of Canton street; thence running westerly through the center of Canton street to the center of Mather street; thence running westerly through the center of Mather street to the center of Cemetery street; thence running northerly through the center of Cemetery street to the center of Pliny street; thence running westerly through the center of Pliny street to the center of Garden street; thence running southerly through the center of Garden street to the center of Albany avenue; thence running westerly through the center of Albany avenue to the center of Woodland street; thence northerly through the center of Woodland street to the center of Greenfield street; thence from said point in a straight line northerly to a point in the center of Coventry street at said Coventry street's southern extremity; thence northerly through the center of Coventry street to the northern boundary line of the city; thence easterly, northerly, and easterly along the northern boundary line of said city to the center of the tracks of the New York, New Haven, and Hartford Railroad Company; thence southerly along the tracks of said railroad company to place of beginning.

FOURTH.

FIFTH.

Commencing at a point in the center of Main street opposite the center of Pratt street; thence westerly through the center of Pratt street to the center of Trumbull street; thence northerly through the center of Trumbull street to the center of Allyn street; thence westerly through the center of Allyn street to the center of Union place; thence southerly through the center of Union place to the center of Asylum street; thence westerly through the center of Asylum street to the center of Spring street; thence northerly

through the center of Spring street to the center of Edwards street; thence northerly through the center of Edwards street to the center of Walnut street; thence westerly through the center of Walnut street to the center of Garden street; thence northerly through the center of Garden street to the center of Pliny street; thence easterly through the center of Pliny street to the center of Cemetery street; thence southerly through the center of Cemetery street to the center of Mather street; thence easterly through the center of Mather street to the center of Windsor avenue; thence southerly through the center of Windsor avenue to the center of Main street; thence southerly through the center of Main street to place of beginning.

SIXTH.

Commencing at a point in the center of Main street opposite the center of Pratt street; running thence westerly through the center of Pratt street to the center of Trumbull street; thence northerly through the center of Trumbull street to a point opposite the center of Allyn street; thence westerly through the center of Allyn street to the center of Union place; thence southerly through the center of Union place and the line of Union place produced southerly to the Park river; thence southerly and westerly through the center of Park river to its intersection with a line drawn through the center of Hungerford street northerly to meet said river; thence southerly on said last mentioned line and through the center of Hungerford street to the center of Park street; thence easterly through the center of Park street to the center of Main street; thence northerly through the center of Main street to the place of beginning.

SEVENTH.

Beginning at a point in the center of Wethersfield avenue opposite the center of Wawarna avenue; thence running easterly through the center of Wawarna avenue and the line of said avenue produced to the west bank of the Connecticut river; thence southerly along the west bank of said river to the southern boundary line of said city; thence westerly along the southern boundary line of said city to the center of Maple avenue; thence northerly through the center of Maple avenue to the center of Webster street; thence northerly through the center of Webster street to the center of Barnard street; thence easterly through the center of Barnard street to the center of Maple avenue; thence southerly through the center of Maple avenue to the center of Benton street; thence easterly through the center of Benton street to the center of Franklin avenue; thence southerly through the center of Franklin avenue to the center of Barker street; thence easterly through the center of Barker street to the center of Wethersfield avenue; thence northerly through the center of Wethersfield avenue to place of beginning.

EIGHTH.

Commencing at a point in the southern boundary line of said city opposite the center of Maple avenue; thence northerly through the center of Maple avenue to a point opposite the center of Webster street; thence northerly through the center of Webster street to Washington street; thence northerly through the center of Washington street to a point opposite the center of Park street; thence westerly through the center of Park street to the tracks of the New York, New Haven, and Hartford Railroad Company; thence southwesterly along the tracks of the New York, New Haven, and Hartford Railroad Company to the western boundary line of the city of Hartford; thence southerly along the western boundary line of the city of Hartford to the southern boundary line thereof; thence easterly along the southern boundary line of the city of Hartford to the place of beginning.

NINTH.

Beginning at a point in the center of Asylum avenue where the North branch of the Park river crosses said avenue; thence running easterly in the center of Asylum avenue to the center of Woodland street; thence northerly through the center of Woodland street to a point opposite the center of Collins street;

thence easterly through the center of Collins street to a point opposite the center of Garden street; thence southeasterly through the center of Garden street to the center of Asylum avenue; thence easterly through Asylum avenue and street to a point opposite the center of Union place; thence southerly in the line of Union place produced southerly to meet the Park river to the Park river; thence southerly and westerly through the center of Park river to its intersection with a line drawn through the center of Hungerford street and extended northerly to meet said river; thence southerly along said line and through the center of Hungerford street to the center of Park street; thence westerly through the center of Park street to its intersection with the south branch of the Park river; thence northerly and easterly along the south branch of the Park river to the north branch thereof; thence westerly and northerly along the north branch of said river to place of beginning.

TENTH.

Beginning at a point in the center of Asylum avenue where the same is crossed by the north branch of the Park river; thence westerly through the center of Asylum avenue to the western boundary line of the city of Hartford; thence southerly along the western boundary of said city to the tracks of the New York, New Haven, and Hartford Railroad Company; thence northerly along the tracks of said railroad company to the center of Park street; thence easterly through the center of Park street to its intersection with the south branch of the Park river; thence northerly and easterly along the south branch of the Park river to the north branch thereof; thence westerly and northerly along the north branch of said river to place of beginning.

SCHOOL DISTRICTS.

ARSENAL DISTRICT, (No. 5). On the South, beginning at a point on west bank of Connecticut river due east of the center of the eastern termination of Avon street, thence running westerly to and through the center of said Avon street to Windsor avenue, thence southerly through the center of Windsor avenue to Belden street, thence westerly through the center of Belden street and diagonally across Albany avenue to Edwards street, thence southerly through the center of Edwards street to Walnut street, thence westerly through the center of Walnut street to Brick-kiln brook; thence on the West, northerly by the course of said brook crossing the north line of Walnut street between Nos. 78 and 80, Liberty street at No. 28, Albany avenue at No. 145, to a point about 150 feet south of the south line of Capen street; thence on the North, easterly in a direct line, crossing Windsor avenue in division line between Hubbard's and Hawley's and at the north line of Suffield street and diagonally across said Suffield street, passing near or just south of No. 92 Bellevue street to the Connecticut river; thence on the East, southerly by said river to the place of beginning.

FIRST DISTRICT, (No. 1)—CENTER DISTRICT, BROWN SCHOOL. On the North and on the West by the south line of the Second North District to a point where the Brick-kiln brook crosses No. 442 Asylum street, then southerly by said brook to Park river; thence on the South, easterly by Park river to the Connecticut river; thence on the East, northerly by Connecticut river to the place of beginning.

NORTH EAST DISTRICT, (No. 8). On the North by the town of Windsor; on the East by the Connecticut river; on the South by the north line of the Arsenal District; on the West by Brick-kiln brook, crossing Capen street at No. 255.

NORTH WEST DISTRICT, (No. 9). On the West, beginning at a granite stone marked "W. M. District" and "N. W. District," 1,034 feet northerly on the intersection of the north line of Asylum street with the East line of Prospect avenue, thence following the westerly boundary line between the town of Hartford and the town of West Hartford to the intersection of that line with the boundary line of the town of Bloom-

field; on the North, by the boundary line between the town of Hartford and the town of Bloomfield; on the East, by the boundary line of the town of Bloomfield and the Brick-kiln brook to Love lane; thence following the Brick-kiln brook to the center of Walnut street and about 35 feet south of said center of Walnut street; thence on the South, due west on north line of West Middle District to the center of the north branch to the Park river; thence on the West, northerly, by said river, to a granite stone marked "W. M. District" and "N. W. District"; thence westerly in a straight line along the boundary line of the West Middle District to the point of beginning.

SECOND NORTH DISTRICT, (No. 3), sometimes called **NORTH MIDDLE DISTRICT.** On the North, by the south line of Arsenal District to the center of Albany avenue and Edwards street; thence on the West, southerly through the center of Edwards street to Brick-kiln brook, thence southerly by said Brick-kiln brook to the center of and crossing at No. 442 Asylum street; thence on the South, easterly through the center of Asylum street to its intersection with Ann street, thence north through the center of Ann street to the center of Church street, thence easterly through the center of Church street to the center of Trumbull street, thence northerly through the center of Trumbull street to the center of Main street, thence southerly through the center of Main street to its intersection with Village street, thence northeasterly through the center of Village street to the center of Pleasant street, thence easterly through the center of Pleasant street to Front street, thence east to a point on the Connecticut river; thence on the East, northerly by said river to the place of beginning.

SOUTH DISTRICT, (No. 2). On the North, beginning at a point 380 feet south of the southeast corner of Warrenton street and Prospect avenue, (the western boundary of the town of Hartford); thence easterly crossing Sisson avenue at the culvert, and following the course of that stream to the north branch of Park river; thence southerly by said branch of Park river, thence easterly by said Park river to the west bank of the Connecticut river; thence on the East by the west bank of the Connecticut river to the southern boundary of the town of Hartford; thence on the South, westerly by Wethersfield town line to the eastern boundary of Goodwin Park; thence northerly along said boundary to the northern boundary of said park to a point 150 feet east of the east line of Maple avenue, thence northerly along a line 150 feet from and parallel to the east line of Maple avenue to a point 135 feet south of the south line of Bushnell street; thence running northerly in a straight line to the east line of Maple avenue to a point where said east line of Maple avenue is intersected by the south line of the Washington School District; thence running easterly in said south line of the Washington School District to a point 200 feet east of Franklin avenue, and some 475 feet south of the south line of Bond street; thence north in a line parallel with the east line of Franklin avenue, and 200 feet distant therefrom at all points, to a point in the center of Wawame avenue produced; thence westerly in the center line of said Wawame avenue produced thence westerly along said line produced from the center of Wawame avenue to the center of Franklin avenue; thence northerly along the center of Franklin avenue to the center of Pawtucket street; thence westerly along the center of Pawtucket street to the center of Maple avenue; thence in a straight line to the center of Seymour street in the north line of Retreat avenue; thence northerly in the center of and to No. 85 Seymour street at a point in the center of Madison street produced, crossing Washington street; thence westerly in the center of Madison street, and in the center of said street produced, in a straight line to a pile of stone some 400 feet north of Hamilton avenue in the south branch of Park river; thence southerly by said south branch to its intersection with the westerly boundary of the town; thence on the West, northerly by said western boundary, New Park avenue and Prospect avenue, to the place of beginning.

SOUTH WEST DISTRICT, (No. 7). On the North by the south branch of Park river and south line of the Washington District; on the East by the South District; on the South by the town of Wethersfield; on the West by the town of West Hartford.

WASHINGTON DISTRICT, (No. 6). Beginning on the South at a point in the center of the south branch of the Park river and Flatbush avenue and running easterly through the center of Flatbush avenue to a point nearly 200 feet east of the west line of Zion street, intersecting a line produced northerly from the center of Fairfield avenue, thence southerly by said line and through the center of Fairfield avenue to a point intersecting the north division line of the land on the east side of said avenue, formerly owned by E. W. Moseley, and now belonging to Thomas D. Crothers, thence northeasterly in the direction of the north division line of said land formerly of said E. W. Moseley; now of said Thomas D. Crothers, to a point 200 feet east of Franklin avenue in the division line between the Washington School District and the South School District, as heretofore established and defined, and some 475 feet south of the south line of Bond street; thence north in a line parallel with the east line of Franklin avenue and 200 feet distant therefrom at all points to a point in a line produced westerly from the center of Wawame avenue; thence westerly along said line produced from the center of Wawame avenue to the center of Franklin avenue; thence northerly along the center of Franklin avenue to the center of Pawtucket street; thence westerly along the center of Pawtucket street to the center of Maple avenue; thence in a straight line to the center of Seymour street in the north line of Retreat avenue, and on the East, on the North, and on the West to the place of beginning by the line of the South School District of said city of Hartford as heretofore established and defined (May 23, 1899.)

Francis Goodwin, 103 Woodland street, to its intersection with the center of Park river, thence northerly, following the north branch of the Park river to a mere stone situated on the north bank of said north branch of Park river, said mere stone being marked "W. M. District" and "N. W. District"; thence easterly in a straight line to a mere stone on the west side of Scarborough street, situated 1208 4-10 feet from the intersection of the north line of Asylum avenue with the west line of Scarborough street; thence continuing in a straight line to a mere stone situated on the east side of Prospect avenue at a point 1,034 feet northerly from the intersection of the north line of Asylum avenue with the east line of Prospect avenue; thence on the West, southerly, by said west boundary of the town (Prospect avenue) to a point 380 feet south of the southeast corner of Warrenton street with its intersection with Prospect avenue; thence on the South, easterly, crossing the culvert to Sisson avenue and the course of that stream to the north branch of Park river; thence southerly by said north branch of Park river and easterly by said Park river to the place of beginning.

Bridges.

ALBANY AVENUE BRIDGES.

1. Over the North Branch of the Park River.

Is 70 feet wide, consists of single arch of 42 ft.—8 in. span, concrete with Portland brownstone facing for the arch-rising, and weathered trap-rock for the remainder of the facing. Coping is of Portland brownstone. Contractors, The Hartford Paving and Construction Co.—Cost, \$20,851.80.

This bridge replaced a wooden bridge built in 1850 costing \$1,800.00.

2. Over the Central New England Railway.

Is 75 ft. wide, consists of one through steel plate girder span 50 feet long. Contractors for the foundation, the Geo. M. Atkins Co., for the steel work, the Berlin Construction Co. Cost, \$47,778.81.

These two bridges were built in 1905-6-7 and were a part of the so-called Albany Avenue Improvements which consisted of eliminating the grade crossing at the railway by lowering the railroad and carrying the highway overhead, and also building a new bridge over the Park River. The cost of the entire work was \$88,482.40 of which the City paid \$38,549.47, the Central New England Railway \$34,532.93, and Keney Park Trustees \$15,500.00.

ASYLUM AVENUE BRIDGE.

Built in 1860, of wood, cost \$1,924.05. Replaced by \$20,000, of which the city paid \$10,000, and the balance was paid by James J. Goodwin. Fred C. Withers, architect. J. P. Felt & Co., of Springfield, contractors.

ASYLUM ST. R. R. AND CHURCH ST. BRIDGES.

Including the approaches of both to the Union Station, completed in 1890, costing \$395,049.84, of which amount the City of Hartford has paid \$107,524.92, being one-half of the cost. June 2, 1891, there commenced a hearing before the Railroad Commissioners for an adjustment, whereby the city should not pay more than thirty per cent., and June 2, 1892 they rendered their decision that the city pay one-half

ASYLUM STREET (PARK) BRIDGE.

Asylum street to west drive on Park; erected 1858 of wood, cost \$2,500. Repaired in 1893 at a cost of \$2,000.

In 1911 the wooden superstructure of this bridge was removed and replaced by a deck plate girder bridge 80 feet wide. One 50-foot span and 2 25-foot spans. Cost \$5,012.80.

BROAD STREET BRIDGE.

Over Park river, built in 1897; steel plate girder, two 60 ft. spans, width 44 ft., cost \$16,854. Over railroad tracks, of the Truesdell pattern, erected of iron in 1867, 2 60 ft. spans, 44 ft. wide, cost \$52,111.79—Railroad Companies paying \$7,550 thereof.

CAPITOL AVENUE BRIDGE.

Across Park river, connecting Capitol ave., with Sigourney street, 1872, cost \$30,163.71. Re-built in 1895 at a cost of \$10,000.

On account of its insufficient width this bridge was replaced in 1918 by a reinforced concrete arch bridge 55 feet wide, of three spans, one being 60 feet and two 45 feet. The facing and parapet railing are of Portland brownstone. The cost was \$40,556.53 of which amount \$5,000.00 was paid by The Connecticut Company. Contractors, The W. T. Ryan Construction Co.

CAPITOL AVE. EXTENSION BRIDGE.

Over the north branch of the Park River at foot of Forest street. A reinforced concrete girder and slab bridge on wooden pile foundation; 75 feet wide; two spans of 24 feet each. Provision made for future double track trolley. Cost \$30,913.04. Contractor Chas. H. Slocumb. This bridge replaced a wooden pile bridge known as the Boulevard Bridge and is a part of the Capitol Ave. Extension Improvement, which consists of extending this street from Willow st. westerly under the N. Y., N. H. & H. R. R. tracks to connect with the Boulevard and Forest st.

COMMERCE STREET BRIDGE.

A swing or draw-bridge, costing \$14,000, built in the fall of 1859. Town paid \$3,750. This has been superseded by a new iron swing bridge 100 ft. long, 36 ft. wide, which was finished in 1887, and cost \$9,100.

CONNECTICUT RIVER BRIDGE.

For Commissioners, see page 1496.

Built in 1808, was an open bridge, carried away by a freshet March 2, 1818, (as was also the bridge at Springfield, 26 miles north of this city) and rebuilt Dec. 1818. It was 1069 feet in length, and cost with the raising of the causeway over East Hartford meadows, in 1859, the sum of \$135,000, divided into 600 shares. This was re-built after the Legislature had abolished the ferry between the two towns, that had been running from 1681, first from foot of Kilbourn st. then changed to Ferry street. In 1836 the ferry was re-established, and boat propelled by two horses, one on each side of the boat. In 1841 this right was rescinded by the legislature. The next year it was restored. The case then went through all the courts, and was decided that the restoration was in violation of the 1818 contract, by which the bridge was re-built. The travel of the bridge by actual count was over 1,000 vehicles and over 1,600 footmen, daily. The 1887 legislature voted to make this a free bridge. June 11, 1888, Edward W. Seymour, Fred J. Kingsbury and Thomas Sanford, the commission appointed by the 1887 legislature to assess the damages, gave their decision which amounted to \$210,000. The legislature of 1889 voted to pay \$84,000 and the towns of Hartford, East Hartford, Glastonbury, Manchester and South Windsor the balance, \$126,000 which was paid, making it a free bridge September 11, 1889. May 17, 1890, the Hartford Bridge Co. voted a final dividend of \$25 per share; making a total of \$345.50 per share paid to its stockholders. The bridge and approaches were taken by the State of Connecticut under Public Act CXXXXIX, session of 1893.

The legislature of May 24, 1895, repealed the act of 1893, and in June, 1895, passed an act creating a "Bridge District," comprising the original five towns, viz., Hartford, East Hartford, Glastonbury, Manchester and South Windsor, thus placing the rebuilding, care and maintenance of the bridge and causeway on the said five towns.

The old bridge was totally destroyed by fire at 7.16 P.M. Friday, May 17, 1895.

A temporary bridge on spiling was built by the Berlin Bridge Co. and opened for travel Saturday afternoon, June 8, 1895; the west end was carried away by freshet, Dec. 23, 1895, at 1.10 A. M.; the remaining portion, except a short length on the East Hartford side was swept away by freshet, March 1, 1896, and the steam ferryboats "Schuykill" and "Nellie" for foot passengers, the "E. C. Fowler" and "Cora" for teams, were run for public travel, comfort and convenience between the two towns. A new temporary iron bridge, to cost over \$30,000, was commenced by the Berlin Iron Bridge Co., May 4, 1896, and opened for travel June 12, 1896.

A \$1,709,000 stone arch bridge was commenced by McMullin, Weand & McDermott, and the cornerstone of the east pier laid April 16, 1904. City of Hartford pays all over \$500,000. Opened to trolley travel, Dec. 8, 1907, and to the general public, Dec. 21, 1907. Dedicated October 6-8, 1908.

EDWARDS STREET BRIDGE.

Over the C. N. E. R. R.

The old bridge consisting of a cast iron and steel truss span on stone abutments was built by the Railroad Company. In 1912 the old superstructure was removed and a new one consisting of one through steel plate girder span, 65 feet long and 60 feet wide was built. The cost was \$12,468.20 divided equally between the City and the Railroad.

FARMINGTON AVENUE BRIDGE.

Across the north branch of the Park River. Built in 1871 of stone, and consisted of two 24-foot semi-circular arch spans, total width 52 feet, at a cost of \$27,901.54.

In 1910 the arches were extended $3\frac{1}{2}$ feet on the south and $12\frac{1}{2}$ feet on the north side giving a total width of 68 feet, and new Portland brownstone faces built, at a cost of \$18,691.00.

FLATBUSH AVENUE BRIDGE,

Built in 1862, cost \$1,974.

FLOWER STREET BRIDGE,

Over the Park River. Built as a foot bridge—Connecting said street with Lawrence st., cost \$464.50; finished December 21, 1878. Rebuilt as a highway bridge of stone and brick, with a 77 feet arch span, 46 feet wide, 11 feet high, with height of 16 feet above average low water, with stone abutments, brick arch and parapets, two sidewalks, each 6 feet wide with a roadway 30 feet wide, costing \$19,557.24, including curbs and sidewalks, and opened for travel July 1, 1886.

FORD STREET BRIDGE.

Cost about \$15,000, and was built in the year 1850; is 35 feet wide, 174 feet long, of five free stone arches,—the north and south of fifteen feet span each—the other three of 18 feet each; width of arches 26 feet; width of piers $5\frac{1}{2}$ feet; height from top of center arch to top of sides, 7 feet. In 1885 the sidewalks on this bridge were extended over the sides on stone brackets, and road bed widened at an expense of \$11,287.64.

On account of these stone brackets yielding slightly and thus allowing the stone parapet railings to spread, the granite side-walk was replaced in 1911 by a reinforced concrete walk with a base extending under the pavement in the one direction and under the railing at the other, thus relieving the stone bracket of the weight of the railing. The cost was \$4,077.73.

In 1914 the easterly wall at the north end was cut back 28 feet at a cost of \$861.78 to allow for the widening of Jewell Street.

FRONT STREET BRIDGE.

Cost \$10,000, and was built in the year 1852; is 44 feet wide, 148 feet long,—of three free stone arches—two of 34 feet span, and one of 35 feet—all semi-circular, and divided or supported by two piers, each six feet wide.

HAMILTON STREET BRIDGE.

Was erected in 1872, at a cost of \$800. Rebuilt in 1898 by a Melan arch 75 ft. span, width 50 ft. Cost \$17,694.78.

HUDSON STREET BRIDGE.

A two span arch structure of plain concrete, with Portland brownstone facing and parapet railing. Spans are each 44 feet in length, bridge is 60 ft. wide. Cost \$48,751.95. Contractor, Chas. H. Slocomb.

LAUREL STREET (RAILROAD) BRIDGE.

Over the railroad tracks at Laurel street crossing, was erected in 1876, at an expense of \$17,357.21—of which the city paid \$9,215.13—the Railroad Companies the balance.

LAUREL STREET (RIVER) BRIDGE.

Over the Park river was built in 1894, at a cost of \$23,000, in place of the wooden pile bridge which was constructed by citizens, and finished July, 1872, at a cost of \$1,500.

In 1907 the southerly abutment of this bridge was rebuilt on new wooden piling at a cost of \$8,871.03.

MAIN STREET STONE BRIDGE.

Is of a single arch, on rock foundation, and is one hundred feet wide, seven feet in thickness at the base, and three feet two inches at the center—the chord span of it is 104 feet, and it is 30 feet 9 inches from the bed of river to top of arch. Cost \$81,526.20. It was planned by the late Bishop Potter, who in 1820 was a professor in Trinity—then called Washington college. The first stone for the foundation of this bridge was laid June 18, 1833, and key-stone of arch inserted Nov. 21st of same year. This bridge was completed in the fall of 1833—less than one year from the time it was begun, by Elias Rathbun, the contractor, whose indefatigable labors thereon brought on a paralyzed side, in-

cluding arm and leg. The bridges of wood on high trestle work that preceded this one, had rows of stores on either side on Main st. over the river, and was called market bridge. The generally expressed opinion of that day, after over half a century's use of this bridge is as true in 1898 as it was in 1833, on the unanimous town vote of its acceptance, that this bridge "combines strength with elegance of architecture, and is honorable to the town." The largest stone arch in this state.

MULBERRY STREET FOOT BRIDGE.

Built of wood in 1854 on abutments of the old Railroad bridge which was built about 1839. Rebuilt of brownstone as a memorial to Jeremy Hoadley by his grandson, George E. Hoadley, in 1909. \$28,800.

NEWFIELD AVENUE BRIDGE.

Over the South Branch of the Park River.

Was erected in 1873, at a cost of \$730.

Replaced in 1915 by a two span reinforced concrete girder bridge on wooden pile foundation. Width of bridge is 45 feet and spans are 25 feet each. Cost \$7,901.87. Contractor, Chas. A. Sibley.

PARK STREET BRIDGE.

Over the South Branch of Park River.

Built in the year 1888, cost \$1,977.40.

Replaced in 1898 by a brick arch of 54 feet span with brownstone facing and railing, costing \$27,903. Width is 70 feet. Contractor, H. J. Mullen.

PROSPECT STREET BRIDGE.

A reinforced concrete girder and slab bridge 58 feet wide, having three spans, two 19 ft. 6 in. and one 19 ft. in length. Total length, end to end of retaining walls is 227 ft. Cost \$28,544.72. Contractor, Fred. D. Miller. Built in 1917-18 when Prospect st. was extended to Sheldon st. Land damages amounted to \$65,411.00 making a total cost of \$94,055.72.

RIVERSIDE STREET FOOT BRIDGE.

Over the South Branch of the Park River.

Built in 1911 at a cost of \$4,340.55 and consists of one through plate girder span, 100 feet long and two approach spans 20 feet long. Width 10 feet.

SIGOURNEY STREET BRIDGE.

Built over the Central New England Railroad, and opened for travel in Aug. 1901. Cost with approaches \$21,988.73, through steel plate girder 100 ft. span 60 ft. wide.

TRUMBULL STREET FOOT BRIDGE.

Erected of iron in 1864, cost \$4,000, and is 75 feet long, 10 feet wide and 18 feet from bottom of river, of one span, and bears ten tons in the center.

This bridge was replaced in 1915 by a single reinforced concrete arch of 75 feet span, 13 feet rise, with Portland brownstone facing and parapet railing. Its width is 16 feet and the cost was \$19,500. Contractors, The Spaulding Construction Co.

WALNUT STREET BRIDGE.

Over the N. Y., N. H. & H. K. R.

Former grade crossing eliminated in 1905 by carrying highway overhead. Bridge is a through steel truss of 120 feet span width of 40 feet. Bridge, abutments and filling cost \$97,253.92. Entire cost of improvement including land damages, \$904,080.51 of which the City paid 25 per cent., or \$51,015.18.

WATER STREET BRIDGE.

An arched stone bridge, at junction of Front, was built in 1857, costing \$2,140.

WOODLAND STREET BRIDGE.

Over the Central New England Railway.

A wooden truss bridge of 30 feet span, 29 feet wide, built by the Railroad Company. In 1914 sidewalks were added at a cost of \$1,234.18 divided equally between the City and Railroad Company.

County Coroners and Medical Examiners.

General Statutes, Revision of 1902, Chapter 111, empower Judges of the Superior Court to appoint for each County, Coroners for three years, and the Coroner of each County to appoint a Medical Examiner for each town. SECTION 4.—"When any person shall come to a sudden, violent, or untimely death, and when any person shall be found dead, the manner of whose death is not known, and one who shall become aware of such death shall forthwith report the same to the Medical Examiner for the Town in which the body lies," etc. If the Medical Examiner is satisfied that the death was not caused by the criminal act, omission or carelessness of another, he reports the case to the Coroner for record; but if, in the opinion of the Medical Examiner, such death was caused by the criminal act, omission or carelessness of another, or is attended with suspicious circumstances, he immediately notifies the Coroner who proceeds forthwith to take charge of the body and make all necessary inquiry concerning cause and manner of death.

The Retreat was chartered by the State in 1822, and was opened for the reception of patients on April 1, 1824. The Connecticut Medical Society was largely instrumental in the establishment of the Retreat, and was the largest single contributor in a subscription list of about two thousand individuals.

The accommodations of the Retreat have been enlarged from time to time, until there are now apartments for one hundred and seventy-five patients. Rooms are arranged singly and en suite. The most modern requirements as to heat, light and ventilation have been carefully provided for. There are several detached cottages on the lawn, some designed for one person, others arranged for three or four patients, with separate apartments for each.

Voluntary patients (including suitable cases of alcohol or drug addiction) desirous of placing themselves under treatment, can be received upon signing this form of application:

"I hereby make application to be received as a patient at the Retreat.

Application for the admission of patients may be made to Dr. W. N. Thompson, superintendent. A brief statement of the case should accompany the application.

ANNUAL MEETING SECOND WEDNESDAY IN DECEMBER.

The Hospital was dedicated May 19, 1859. The accommodations have been enlarged from time to time, the Wildwood Sanatorium for incipient cases of Tuberculosis and the large children's ward—a gift in memory of Miss Eliza Trumbull Robinson. The McCray Ward has been established in connection with the lying-in-ward, with a capacity of 16 beds. The new Administration Building was completed and occupied in November 1916, adding not only administration offices but also 40 additional private rooms. The Hospital has a total capacity including Wildwood Sanatorium of 500 beds.

The Hospital Training School for Nurses was established in 1877. The school has grown steadily with the increased work of the Hospital. There are now 125 nurses in the school and a staff of 32 graduate nurses. During the past year a class of 48 was graduated, having completed the regular three year course of study. There is a Nurses' Residence on the grounds separate from the other buildings. This building contains sitting rooms, dining room, sleeping rooms and lecture rooms. They are also supplied with tennis court, skating rink, assembly hall, moving pictures, etc.

The Wildwood Sanatorium was opened in 1902. This branch of the institution is situated at Wildwood Farm on New Britain avenue, has a capacity of 56 beds, and is for the exclusive treatment of early cases of Tuberculosis.

The growth of the Hospital will be better realized by comparing the capacity at the opening with that at present. In 1860 the number of beds was 48, wards 40, private rooms 8. The present capacity is 500 beds, wards 406, accommodations for private patients, 94. In Oct. 1907, twelve new private rooms, and the new Dunham Operating Room were completed and opened for service. The Erwin Clinic for Eye, Ear, Nose and Throat cases opened Jan. 1909. Addition to Maternity and Gynecological wards opened Jan. 1, 1913.

The private rooms are now open to any properly registered Physician or Surgeon who may apply to the Hospital for admission of patients to be treated by him in the private rooms of the Hospital. The application will be referred to and acted upon by the Executive Committee. The Dunham Operating Room is for the private room patients only. New three-story brown stone Laboratory, the gift of Mrs. John C. Wilson. Occupied April 15, 1922.

St. Francis Hospital was established in 1897. Incorporated April, 1899. It is under the care of the Sisters of St. Joseph. During the past year it treated 7,517 patients. There were 947 births.

The School of Nursing was organized in 1897 and it is the earnest purpose to maintain a standard worthy of high ideals. The founders recognized the value of nurses of the right calibre to the community, and offer good instruction, valuable experience, and personal care of the students, that the school shall graduate so fine a type of woman in all those essentials that go to make up real womanhood and character, that the best dreams of the founders shall be more and more realized as the years go on.

Candidates wishing to undertake this course of instruction must apply to the Superintendent of Nurses. A personal interview is necessary. Unblemished character, health, intelligence, one year in high school or its equivalent, and a readiness to conform to the rules of discipline are required.

First rooms were located southwest corner of Grove and Prospect streets, and were opened April 29, 1878. Later the house on the opposite corner, (southeast) was occupied by the Association. In January, 1887, the Association removed to the Foster Building, corner of Asylum and Ann streets, occupying a large portion of the second floor, and introducing a *Physical Department*. On November 8, 1893, the new and commodious building now occupied was opened to the public with appropriate exercises. In April, 1913, Mr. Appleton R. Hillyer gave \$150,000, and about four thousand other citizens of Hartford gave \$160,000. The sum of \$310,000 was used in erecting the seven-story building adjoining the first building, and is used for the Boy's Division and Dormitories for young men. This entire plant represents a half million dollars investment. This building is a center for the religious, social, educational and physical welfare of young men and boys.

The Association is organized into departments, such as *Business, Dormitory, Educational, Information and Relief, Boys, Physical, Social and Religious*. Under these different departments, the needs of a varied and very large class of young men are met. All creeds are welcome to join. The fee charged for the many privileges offered being placed at a moderate figure, and adjusted by departments, so that a member is not obliged to pay for features in which he is not particularly interested.

The *Educational Department* is worthy of the remaining space on this page. It was endowed in December, 1892, with fifty thousand dollars (\$50,000) by Mr. APPLETON R. HILLYER and Miss CLARA E. HILLYER, as a memorial to their deceased father Gen. CHARLES T. HILLYER, and in May, 1906, was further endowed with \$50,000 by a bequest from Miss CLARA E. HILLYER, who died that month. It is known as

The HILLYER INSTITUTE of the Young Men's Christian Association of Hartford.

Automobile School, Department of Commerce and Finance, Department of Boys' Education, Department of English and Citizenship, Industrial and Technical Department

About thirty teachers are employed, giving instruction in the following branches:

Owners', Ladies', and Chauffeurs' Auto Courses, Boys' Summer School, Boys' Night School, First Aid, Bookkeeping, Accounting, Business Law, Penmanship, Salesmanship, Spanish, English for new Americans; Blue Print Reading, Building Design, Architectural Drawing, Machine Drawing, Tool and Machine Design, Electricity, Estimating, Pharmacy, Plan Reading, Plumbing, Wireless, six branches of Mathematics, etc.

If the class is large it is subdivided and has more than one teacher. The instruction is given in the evening in order to reach those who are employed in the daytime.

The year consists of 20 weeks for most courses.

The Term will open second week in October. There are classes meeting nearly every week of the year.

Application for membership in any Department of the Association should be made at the **Business Office in the Building.**

ample site of fourteen acres, now the Capitol grounds, but then described as about three-quarters of a mile from the city. Academic work was begun in buildings temporarily engaged for that purpose, on the 23 day of September, 1824. The beginning of a good library was soon made, and in a few years the collection of books, with those belonging to the Rev. Prof. Jarvis, was said to be the most select in the country and less in number than that in the library of one other college only. There was soon, also, a valuable museum. Two things proposed in the scheme of instruction were novel in their character: the arrangement for practical work in the scientific department, and the admission of partial students to pursue select courses of study. In 1845 the name of the College, on the petition of the Alumni and the Corporation, was changed to Trinity College; in the same year a third building, Brownell Hall, was erected. In 1874 the campus was sold to the city as a site for the new State Capitol. A new site of some eighty acres on high land in the southwestern part of the city was purchased, and ground was broken in 1875 for buildings. They now consist of the west side and a part of the north end of a projected great

The Charter of Washington (since 1845 Trinity) College was granted by the General Assembly in 1823; and, in consequence of the generous gifts of the citizens of Hartford to the new institution, it was located by the Trustees in that city. The Rt. Rev. T. C. Brownell, D.D., LL.D., Bishop of Connecticut, was chosen president; and in 1824 two buildings, afterwards known as Seabury Hall and Jarvis Hall, were erected on an

quadrangle nearly seven hundred feet in length, the several portions of which are known as Jarvis Hall, Northam Towers, a gift of Col. Charles H. Northam; Seabury Hall, and the Williams Memorial, (not shown in the cut), a gift of the late J. Pierpont Morgan, LL.D.; the Jarvis Laboratories, a building divided between the departments of Physics and Chemistry; the Boardman Hall of Natural History, containing the Museum and laboratories for Biology, Botany, Geology, and Mineralogy; the St. John Observatory; and a Gymnasium containing also a Hall for public meetings. The Library, placed in the Williams Memorial, contains about 90,000 vols. The Museum in Boardman Hall has rich collections. The Chemical and Physical equipment in the Jarvis Laboratories is excellent. Within a few years liberal additions, from gifts and legacies, have been made to the funds of the College.

The College offers two courses of instruction, a Course in Arts and a Course in Science. These courses extend over four years.

The Course in Science includes Civil Engineering, Electrical Engineering, and Sanitary Engineering.

Students completing the Course in Arts receive the degree of Bachelor of Arts and those completing the Course in Science receive the degree of Bachelor of Science. The Statutes provide that students who do not propose to attend the whole course of instruction may be permitted, under the name of Students in Special Courses, to recite with regular classes in such studies as, upon examination, they shall be found qualified to pursue.

REQUIREMENTS FOR ADMISSION.

The requirements for admission are substantially the same as at other New England Colleges. All candidates are examined in Algebra, Geometry, History, and English.

Candidates for the Course in Arts are further examined in either Latin or Greek, or both, and may substitute either German or French for Latin or Greek.

Candidates for admission to the Course in Science, besides fulfilling the general requirements stated

above, are required to select studies in Languages, Mathematics, or Science sufficient to bring their total preparation up to the same standard as that for the Course in Arts.

Each student is required to take at least fifteen hours a week. Most of the work of the last three years is in elective studies, in which over one hundred courses are offered. All students have regular work in the gymnasium, under the charge of an instructor.

The entrance examinations are now under the College Entrance Examination Board; those in the Fall are held at the College, immediately before the beginning of the Christmas Term.

The academic year is divided into two terms. The year begins on the third Thursday in September, and extends to Commencement, which falls on the third Monday in June (in 1922, June 10th). There is a recess of two weeks at Christmas, and another of ten days in the spring.

The Library, which is open every week day, contains about 90,000 volumes, exclusive of many duplicates and unbound pamphlets. The Burgess, Elton, Sheffield, Peters, Athenæum, Alumni, Northam, Balch and Peck Library Funds amount to about \$35,000.

The Museum, open to students every week day, and to the public Wednesdays and Saturdays from 3 to 6 p. m., contains valuable collections in Natural History, Geology, and Mineralogy, including a complete suite of Ward's casts, a large collection of skeletons, specimens of rocks, photographic views, etc.

The Observatory is provided with a telescope by Brashear, mounting by Warner and Swazey.

The Treasurer's bills, including tuition, room rent, heat, and incidentals, vary from \$300.00 to \$490.00 per year, according to the location of rooms. (Laboratory fees are to be added.) The amount of these bills is considerably reduced to holders of scholarships. For holders of those scholarships which remit the entire charges for tuition and room rent, the Treasurer's bills are reduced to \$72.50; and the necessary expenses of such students, including board and other personal items, need not exceed \$300 or \$350 a year. Application for any scholarship should be made in writing to the President, at or before the beginning of the term in which the student intends to enter.

Most of the rooms in the College buildings are so arranged as to provide that two students rooming together have a common study and separate bedrooms. All rooms are heated by steam and lighted by electricity; ventilation is secured by open fire-places. Water is carried to each section.

Prizes are awarded each year for excellence in special work, as tested by written theses or examinations, for some of which special endowments have been provided, and also for excellence in composition and declamation. To these prizes have been added the three Holland Prize Scholarships, each having the annual value of about \$600, the Russell Fellowship, and the Terry Fellowship.

The number of the Alumni of the College is above 2000, of whom about 1300 survive.

The LIBRARY contains about 116,000 books and 60,000 pamphlets, the larger part of which was secured through the liberality of the late NEWTON CASE. It includes many rare and valuable books, and is especially rich in biblical texts, bibliography, Arabic literature, Reformation history, Lutheran and Hymnology. It is open to students and the public generally for consultation and the drawing of books from 8 A. M. to 3.30 P. M., Sundays excepted. The CASE MEMORIAL LIBRARY is a large fireproof building.

The READING ROOM receives over 280 periodicals, including daily papers, various religious weeklies, and all the leading reviews.

The MUSEUM contains the large collection of curiosities from missionary lands gathered by the American Board, together with many acquired by the Seminary, and the Silvia Davison Paton Palestinian Ethnological Collection.

The academic year begins the last Wednesday in September and closes the last Wednesday in May. It is divided into two Semesters of fifteen weeks each, with recesses at Thanksgiving, Christmas, and in the Spring.

HARTFORD GRAMMAR SCHOOL, 39 *Hopkins st.*

A classical school was founded in Hartford in 1828, which was partly supported by the town and partly by tuition fees. It received its first bequests in 1655, 1669, 1664 and 1680. The town for more than a century managed this school, when they petitioned in 1798 for an act of incorporation, and it was thus acquired in 1847 under the corporate name of the "Trustees of Hartford Grammar School," when it was merged with the Classical Department of the Hartford Public High School. Previous to this merging, the school was held in a two story brick building on the southwest part of Linden place.

Parks.

For Commissioners, see page 1597.

BUSHNELL PARK,

Was laid out in 1853, and voted for in 1854, contains 43 1/2 acres with the 15 acres purchased of Trinity College in 1872, and is bounded northerly by Asylum st., Ford st., and Jewell st.; easterly by Wells st.; southerly by Elm st. and the Capitol Grounds and westerly by the State Armory Grounds. Total cost of land and construction, not including the annual care thereof, \$1,044,950.00.

There are over 150 distinct varieties of trees, and over 600 specimens, besides hundreds of shrubs, flowers, etc. Also, concrete and other walks in all directions, and roads for vehicles on the west to the Capitol Grounds.

There are four and a half miles of walks in this Park. The Common Council of this city at a regular meeting held Feb. 14th, 1876, only three days previous to the decease (which occurred on Feb. 17), of the late Rev. HORACE BUSHNELL, D.D., unanimously passed, and on the same evening, officially sent to him sundry resolutions concerning this park laid out by the city in 1854, which owes its origin and successful execution in a large degree to his foresight, to his able and earnest advocacy, and to his influence, freely and with generous persistence exerted in public, in private and through the press, and in recognition of his invaluable services thereon, they Resolved, That the public park now commonly called "The Park," be and hereby is named "BUSHNELL PARK."

June 17th, 1874, a Bronze Statue 8 feet in height, of Gen. ISRAEL PUTNAM, weighing 1,200 lbs. was erected on this Park which with the pedestal of Quincy granite cost \$14,000—presented by the late J. P. Allyn.

July 22, 1875, a Bronze Statue of Dr. HORACE WELLS, the discoverer of Anæsthesia, in September, 1844, was erected on this Park at a cost of \$10,000—one half paid by this State and the other half by the city of Hartford.

In 1884 the Soldiers Memorial Arch was erected at the south end of Ford st. on Bushnell Park and was placed under the care of the Park Commissioners in 1893, at a cost of \$65,000.

March, 1898, the two 9-inch Dahlgren Guns which were on the warship "Hartford" through its engagements on the Mississippi River and Mobile Bay were presented to the City through the influence of Senator J. R. Hawley. Mounted either side of the Terrace.

In 1899 the beautiful Corning Fountain with Indian figures was presented to the City of Hartford by John J. Corning of New York in memory of his father. In 1908 a playground for small children was established.

June, 1910, the Hoadley Memorial Bridge, at the foot of Mulberry st., erected in memory of the Hon. Jeremiah Hoadley and given by his grandson, George E. Hoadley, was presented to the City of Hartford. It cost \$36,000.

In 1917 a stone arch bridge was erected at the foot of Trumbull st.; a large proportion of the expense was given by an anonymous donor.

In 1917 a gift from Leonard Morse was received, the income of which was to be disposed of as seemed best by the Park Board. They established the Leonard Morse Gardens between the two bridges opposite Gold st.

In 1917 a dam was built just below the Hoadley Memorial Bridge and the banks between the two bridges were terraced.

ELIZABETH PARK,

Has 100 acres, on Prospect and Asylum avenues, the gift of Charles M. Pond in 1895, and developed from plans of Theodore Wirth, for ten years Park Superintendent of Hartford. This is the garden park of the City, and has greenhouses, the celebrated rose-garden, containing 275 varieties and 10,000 different rose plants, and is claimed to be the largest and most beautiful in the country; one ball diamond, picnic groves, swings, sunken garden, bowling green, curling pond and a refectory. Mr. Pond left \$200,000 for its development.

In 1916 an all-the-year-around playground for little folks was established on the east lawn.

POPE PARK,

Colonel Albert A. Pope gave in 1895 some 70 acres of land in the southwestern section of the city, on Capitol avenue, Laurel and Park streets, and Park Terrace for use by the citizens as a public park for all time without restriction. The City bought 13 acres adjoining this, from the Watkinson Farm School, and 5 acres from the Hartford Orphan Asylum. It is in the manufacturing district and has children's out-door gymnasium, baseball diamonds, lakelets and a children's playground.

KENEY PARK,

The gift of Henry Keney. Rev. Francis Goodwin, William Tucker, Mr. Henry H. Goodwin, Mr. F. Spencer Goodwin, Trustees. Olmsted Brothers, Brookline, Mass., Landscape Architects. Mr. Geo. H. Hollister, 273 Westland St., Superintendent. G. A. Parker, 100 Blue Hills Avenue, Director. The purchase of land commenced early in 1896, and was completed in 1897. 673.2 acres of land was purchased in thirty-five different lots. Keney Park is bordered by Windsor avenue on the east, by Blue Hills avenue and Park river on the west, and on the northwest by Holcomb street. Its north boundary line is the north line of the city. Tower avenue, Vine street and Love lane pass through it, and Barbour street, Waverly avenue, Harper street and Woodland street extension connect with it. It is a driving or country park, which requires minimum cost of maintenance.

Ten acres were sold to the city in 1915 for a high school site, thus reducing the number of acres to 673.2.

RIVERSIDE PARK,

Has 80 acres, was bought by the commissioners in 1896, in the eastern section of the city, on the river front, between the East Hartford bridge and the N. E. Railroad bridge. It has groves, school garden, play ground and speedway. In 1910 a new caretaker's house was erected at a cost of \$5,000.

In 1917 an entrance street by way of Morgan street was constructed by the Street Department and the lands of the Water Board were leased to the Park Board at a nominal rental.

COLT PARK,

Has 108 acres, the gift of Mrs. E. H. Colt, extending between Wethersfield ave. and the Connecticut River, is becoming the great play-ground of the City. It has a memorial statue of Colonel Samuel Colt, the inventor of the Colt revolver. The grounds about the small lake are decorated with many marble statues, some original and some copies of famous sculptors; the goat suckling her eager kid; a mastiff teased by a puppy; Hebe pouring out nectar for the gods; Apollo, a copy of the original in the Vatican; Diana surprised while bathing. It has a bowling green, ten lawn tennis courts, fourteen ball diamonds and a one-quarter mile running track. It is greatly in demand for skating, and the part next to Wethersfield avenue is well lighted.

In 1916 a gift of land was presented by Charles E. Gross, and a few acres were added to the Park.

GOODWIN PARK,

Has 200 acres and was acquired by purchase. It extends from South street to Jordan Lane, and from Maple avenue to midway between Maple avenue and Wethersfield avenue. It is a country park at the extreme end of the City, and one entrance opposite Cedar Hill, with splendid driveways, magnificent groves and beautiful lakes, and a eighteen-hole golf course established in 1907. In 1911 a House with baths, lockers, etc., was erected for the public comfort.

ANCIENT CEMETERY,

Located on Gold street, rear of the Center Church, has an area of 1 1/2 acres. A brown stone monument with names of first settlers of Hartford. It was reclaimed with the widening of Gold street, and fenced in 1900.

ASYLUM AVENUE GREEN.

Is a long, narrow triangular strip of land on the corner of Asylum avenue and Sigourney street, and cared for by the house owners. It has an area of 41-12 of an acre.

BARNARD PARK.

Has 1½ acres. Junction of Main, Park, Jefferson, Congress and Wyllys streets, Wethersfield and Maple avs., and South Park place. March 26, 1816, the town voted a fence for this Park, then called South Green. In 1898 name changed to Barnard Park in honor of Henry Barnard, the educator. From the beginning of the City it has been public grounds, formerly used as a circus ground and for military parades.

BUCKINGHAM SQUARE.

Has ½ acre on Buckingham, north side, between Main and Whitman sts., laid out and fenced in 1890.

CAMPFIELD MEMORIAL GROUNDS.

Has ½ of an acre, was acquired by the Grand Army in 1899 to mark the spot of the camping of the Connecticut troops during the Civil war. It has a statue of General Griffin A. Siedman.

CHARTER OAK MEMORIAL.

Has 1-16 of an acre, a gift of the Society of Colonial Wars in 1906. The location of the site of the Charter Oak, as near as known, is marked by a fine Granite monument, and is at junction of Charter Oak avenue and Charter Oak place.

CITY HALL SQUARE.

So called since 1879; is under the care of the City Building Commission.

FRANKLIN GREEN.

Has about 1-5 of an acre, junction of Franklin and Maple avenues, laid out in 1876.

KENNY MEMORIAL.

Main street and Ely st., 1.61 acres, the gift of Henry Kenney, the site of his father and mother's old home-stand, and his grocery store and business. It is decorated with a splendid clock tower, erected in memory of his mother to commemorate the early struggles through widowhood for her two young sons, Henry and Walter. It is the first monument erected in this country to a woman in common life under these privations, a son's tribute to her.

LAFAYETTE SQUARE.

Has ½ of an acre, junction of Washington, Buckingham and Lafayette streets, was acquired by purchase in 1883, and cost \$10,320.

ROCKY RIDGE PARK.

Has an area of 28 acres, as yet undeveloped, but was formerly the trap rock quarries for obtaining stone for the streets of Hartford. It was obtained partly by exchange of land with Trinity College, and part of it was always held as public property, never having a private ownership.

SIGOURNEY SQUARE PARK.

Has about 2½ acres between Ashley, Sigourney, Sargeant and May streets, laid out by the town in 1896, a part of the old town farm; declared a public square in 1895 by the City Council.

TUNNEL PARK.

Has ½ of an acre at the junction of Main street, Albany and Windsor avenues. It is owned by the N. Y., N. H. & H. R. R. Co., and leased at a nominal rental for park purposes to the City of Hartford in 1874. Improved as a park in 1891.

VILLAGE STREET GREEN.

Has 1-8 of an acre, junction of Windsor and Village streets. It has some fine old trees, and has been public grounds since 1834.

WASHINGTON STREET TRIANGLE.

A small triangle at the junction of Retreat avenue, Washington and Vernon streets. Laid out Oct. 2, 1899 and accepted as a Park Sept. 4, 1900.

WINDSOR STREET PARK.

At a special city meeting held in October, 1875, the Court of Common Council were authorized to lay out at public expense, a park between Avon, Front, North and Windsor streets,—not begun, July, 1917.

HARBISON PLAYGROUND.

In 1913, the Harbison playground, located on Hill-side avenue, opposite Ward Place, 2½ acres, not yet developed, was the gift of Mr. John P. Harbison to his adopted city.

GEORGE H. DAY PLAYGROUND.

In 1917, the George H. Day playground, the gift of the Boulevard Park Company, of 1½ acres, was named by the Board of Park Commissioners in honor of Mr. George H. Day, who in his life time was very active in having this ground used for playground purposes.

CONNECTICUT STATE LIBRARY AND SUPREME COURT BUILDING. Corner stone laid May 25, 1909.
STATE LIBRARIAN, *George S. Godard*. 211 CAPITOL AVENUE, HARTFORD.

Is of granite, an adaptation of the Italian renaissance style of architecture; fire-proof throughout, and is a companion building to our beautiful Capitol just across the lawn. It is T shaped with a frontage of 294 ft. 8 in. on Capitol av. and a north to south depth of 137 ft. 6 in. The east and west wings of the T are each 106 ft. 8 in. long and 84 ft. 8 in. wide. The stem of the T or south wing is 60 ft. wide and 76 ft. 6 in. long. The main entrance has been placed 90 ft. back from the curb; entrances are also on ground floor at east and west ends.

The building is divided into three main floors, with a basement under central portion which accommodates the entire heating and ventilating machinery, and from which starts the proposed subway to the Capitol. The boilers for heating are located in a separate building. The ground floor is on level of the street curb. The main floor upon which is located the main reading room of the State Library, Memorial Hall, and Supreme Court Room is fourteen feet above the ground floor and is reached from Capitol av. by granite steps; this is a large room with barrel vaulted ceiling which is carried by massive columns and pilasters executed in marble of buff color. Located at the east end of this central hall and opening from it, is the main reading room of the State Library; on the west end is the Supreme Court room and its several departments, while adjoining on the south opposite the main entrance is the Memorial Hall; provision has been made in this hall for portraits of the Governors, Stuart's portrait of Washington, and display of the Old Charter; it occupies the stem of the T and is 51 ft. wide, 85 ft. long and 35 ft. high, amply lighted by means of an artistic sky-light.

The Supreme Court room, 43 ft. wide, 90 ft. long and 35 ft. high, is con-

veniently located with reference to the offices of the several officers of the court and the studies of the several associate justices, all of which are provided with the most modern equipment.

The Library Reading room located in the east wing is 43 ft. wide, 90 ft. long and 35 ft. high and lighted by six large windows facing north. Along the south side of this room is placed a two-story steel stack with open shelves for the law library and general works of reference. The balance of the floor will be occupied by the special study and reference tables and catalogue cases. Located near this main reading room is the librarian's office, the main stack room, the study and dictation rooms, vaults for archives, records, valuable papers and collections, the newspaper room and rooms for cataloguing, repairing, packing and storing.

The building is equipped with three automatic passenger and service elevators, a modern heating and ventilating plant, and should meet the needs of the state as the home of its Supreme Court and State Library for generations. The large number of gifts of special collections already received from individuals and societies are evidences that the facilities offered are appreciated.

The site cost about.....	\$175,000
The building, when completed and furnished, about.....	1,200,000
Total cost, approximately.....	\$1,375,000

CONNECTICUT STATE LIBRARY AND SUPREME COURT BUILDING. Corner stone laid May 25, 1909.
STATE LIBRARIAN, *George S. Godard*. 211 CAPITOL AVENUE, HARTFORD.

Is of granite, an adaptation of the Italian renaissance style of architecture; fire-proof throughout, and is a companion building to our beautiful Capitol just across the lawn. It is T shaped with a frontage of 294 ft. 8 in. on Capitol av. and a north to south depth of 137 ft. 6 in. The east and west wings of the T are each 106 ft. 8 in. long and 84 ft. 8 in. wide. The stem of the T or south wing is 60 ft. wide and 76 ft. 6 in. long. The main entrance has been placed 90 ft. back from the curb; entrances are also on ground floor at east and west ends.

The building is divided into three main floors, with a basement under central portion which accommodates the entire heating and ventilating machinery, and from which starts the proposed subway to the Capitol. The boilers for heating are located in a separate building. The ground floor is on level of the street curb. The main floor upon which is located the main reading room of the State Library, Memorial Hall, and Supreme Court Room is fourteen feet above the ground floor and is reached from Capitol av. by granite steps; this is a large room with barrel vaulted ceiling which is carried by massive columns and pilasters executed in marble of buff color. Located at the east end of this central hall and opening from it, is the main reading room of the State Library; on the west end is the Supreme Court room and its several departments, while adjoining on the south opposite the main entrance is the Memorial Hall; provision has been made in this hall for portraits of the Governors, Stuart's portrait of Washington, and display of the Old Charter; it occupies the stem of the T and is 51 ft. wide, 85 ft. long and 35 ft. high, amply lighted by means of an artistic sky-light.

The Supreme Court room, 43 ft. wide, 90 ft. long and 35 ft. high, is con-

veniently located with reference to the offices of the several officers of the court and the studies of the several associate justices, all of which are provided with the most modern equipment.

The Library Reading room located in the east wing is 43 ft. wide, 90 ft. long and 35 ft. high and lighted by six large windows facing north. Along the south side of this room is placed a two-story steel stack with open shelves for the law library and general works of reference. The balance of the floor will be occupied by the special study and reference tables and catalogue cases. Located near this main reading room is the librarian's office, the main stack room, the study and dictation rooms, vaults for archives, records, valuable papers and collections, the newspaper room and rooms for cataloguing, repairing, packing and storing.

The building is equipped with three automatic passenger and service elevators, a modern heating and ventilating plant, and should meet the needs of the state as the home of its Supreme Court and State Library for generations. The large number of gifts of special collections already received from individuals and societies are evidences that the facilities offered are appreciated.

The site cost about.....	\$175,000
The building, when completed and furnished, about.....	1,200,000
Total cost, approximately.....	\$1,375,000
